

## Make Us Your Curriculum's Research Component

The online P-EBP course is designed with Canadian paramedic schools in mind. Special care is taken to ensure that this content meets the PCP NOCP 2011 guidelines and has been reviewed by PAC.

This is a self directed course through Dalhousie's Online Web Learning platform. The students can be enrolled at any time, will be guided through the course module content, quizzes and resources. The students will have access to our EBP experts during the course.

Upon completion the student will receive a certificate from Dalhousie University's Division of EMS.

## Dalhousie University's ONLINE Paramedic Evidence-Based Practice Program

*Applying the principles of EBM to paramedic clinical practice*

<https://emspep.cdha.nshealth.ca/>

## 9 Step Introduction to Evidence-Based Practice

- Forming your PICO
- Searching the Lit
- Intro to Study Design
- Reading the Lit
- Ethics
- Assessing Validity
- Levels of Evidence
- Using the PEP Project
- Applying to Practice

## Expanding the Audience

*The online format allows EBP to reach more paramedics than ever!*

Participants will learn the fundamentals of developing a concise clinical query and conducting a literature search.

P-EBP sources of research such as: the Prehospital Evidence-based Practice (PEP) Program and PubMed/Medline are introduced. The course will explain, step-by-step, how to read research literature, distinguish different study designs, and how to make judgments about the validity and applicability of studies. The participants will be introduced to research language and will gain an awareness of very basic statistics.

The course teaches the participant how to appreciate the tools used to appraise literature and compile evidence-based recommendations.

**To Enroll:** email [EMS@Dal.ca](mailto:EMS@Dal.ca) or visit:

## Format

This is a completely online course. The student is self-directed through each module.

In order to advance to the next module, the student must pass a short quiz outlining the key learning points of that topic.

### Need CEU's?

Online P-EBP is a great way to supplement your continuing education.

It takes approximately 3 hours to complete at your own pace.

Upon completion, you'll receive a certificate from Dalhousie's Division of EMS.
